

Taking Input in Java

- We Use Scanner class to take input in JAVA in util package.
- System>lang
- PrintStream>io
- Javap java.io.PrintStream
- String>lang
- Javap java.util.Scannen
- For integer use ***nextint***
- For float use nextFloat
- Else of lang packages, any methods we use of any packages we use in our java program .. we need to import it in our program.
- Attributes = instance vars
-
